Avid media composer update

AVID just released an update on its famous nonlinear editing software: Avid Media Composer 2020.10. AVID is moving quickly and continuously releasing software updates for its famous Media Composer editing software. This year, they already released version 2020.4, which we discussed here, which included support for the latest Apple Mac Pro and ProRes support for Windows users. Avid Media Composer 2020.10 Update FeaturesAVID has just released its latest Avid Media Composer 2020.10 update, which includes only a few (yet big) changes, including: Support for the latest macOS version: macOS 10.15.7. Media Composer 2020.10 now supports linking and playback of ProRes RAW media using Universal Media Engine Plugins. However, you cannot export ProRes RAW at the time. And that's it about major changes. Of course, this update also fixes a lot of minor errors, you can read the full list here. This may seem like a minor update, but it's a special avid Media Composer user who can now work with ProRes RAW footage inside their favorite NLE. For MacOS v10.14 and earlier, make sure that the Pro Video Formats package is installed (if it is not already available). You can download here for free. Windows 10 for 64-bit systems must install the Apple SDK on your PC, which is available for download here. Apple ProRes RAW now supports many editing applications, including Adobe Premiere Pro, FCPX, ASSIMILATE SCRATCH, Colorfront, FilmLight Baselight, Grass Valley Edius. It still does not support DaVinci Resolve, but the upcoming DaVinci Resolve 17 version announcement in a few days could change things. Pricing and availabilityAvid Media Composer 2020.10 update is free for all existing users. If you're not an avid Media Composer user, the software is \$23.99/month or \$239.00/year. For more information, you can visit the AVID website here. What do you think about this Media Composer 2020.10 update? Are you using Media Composer or other NLE? Let us know in the comments below! Got a Media Composer Perpetual License? Here's how to access the latest video production software and tools: I OWN I'LL GET WITH ACTIVE 1 Year Software Updates + Support Plan, what's about to expire (formerly known as the Annual Upgrade and Support Plan) To restore my annual plan to my avid account to save all the same collaboration team workflows and avid NEXIS integration I currently have to renew now media composer 1-Year Software Updates + Support Plan RENEWAL, which includes access to all new releases and standard support for a one-year Perpetual license without 1 year Software Updates + Support Plan, but want to switch to subscription Crossgrade to Media Composer | Ultimate subscription to access the latest software Crossgrade Media Komponists | Ultimate 1-Year Subscription Crossgrade no Perpetual, kas kas save me up to \$200 USD/year in the first year before the standard price kicks in to access all new releases and ExpertPlus support, Media Composer | PhraseFind variant, ScriptSync variant, symphonic option, and the NewsCutter option throughout my subscription I OWN I OWN I NEED I'LL GET WITH AN ACTIVE 1 YEAR SOFTWARE UPDATES + SUPPORT PLAN THAT IS GOING TO END RENEW MY ANNUAL PLAN IN MY AVID ACCOUNT EDUCATIONAL PRICING REBUILD NOW MEDIA COMPOSER 1-YEAR SOFTWARE UPDATES + SUPPORT PLAN RENEWAL, WHICH INCLUDES ACCESS TO ALL NEW RELEASES AND STANDARD SUPPORT FOR ONE YEAR WITHOUT 1 YEAR SOFTWARE UPDATES + SUPPORT PLAN IF YOU'RE ELIGIBLE STUDENT OR TEACHER, TRANSITION TO MEDIA COMPOSER | Ultimate Subscription Education Price for Crossgrade Now Media Composer | Ultimate 1-Year Subscription-Education Pricing, which includes access to all new releases and ExpertPlus support throughout my Subscription Access to Media Composer | PhraseFind option, ScriptSync option, symphonic option, and NewsCutter option throughout my subscription Please note that you must be a qualified student, teacher, or faculty member of the academic institution to obtain a Media Composer license at educational prices. Check that you are fit. If you have a physical dongle that needs to be updated, you can download the Dongle Updater .avd file from your avid master account. Just find the system ID under My Products and Subscriptions, and under Product information and download links, click Download dongle updater file. Click here for guidance on how to update your Dongle AVID has released a new update to AVID Media Composer, its popular video editing software. The new version, AVID Media Composer 2020.4, includes many new features, but the biggest one for Mac users is that the software is finally 64-bit. Apple's macOS Mojave was the latest version of Apple's operating system to support 32-bit apps. Apple warned software developers for a couple of years that 32-bit apps will no longer be supported by macOS Catalina. As photographers and videographers a both have upgraded to macOS Catalina or purchased new computers such as Apple's latest Mac Pro, which ships with Catalina, they had to deal with outdated software no longer supported. By AVID Media Composer 2020.4, that list of unusable software included in Media Composer. In addition to that 64-bit, AVID Media Composer 2020.4 also includes the new Universal Media Engine (UME). This new UME speeds up the entire workflow directly from removing the file by removing reliance on QuickTime. AVID promises that the new UME will be felt through improved performance during import, playback, editing and exporting files. Windows users can now create, edit, collaborate, and export Apple ProRes media natively. This includes full coding and decoding support. However, according to Cinema5D, it seems that this may not be a support for ProRes Files. The AVID's latest blog post detailing Media Composer 2020.4, no ProRes RAW. Get bird's eye view of the entire sequence of 128 songs with a timeline sequence map, allowing for faster navigation without scrolling or changing the view size. Image and text credit: AVID AVID Media Composer 2020.4 updates are not only under the hood of upgrades, the team has also worked to improve the user interface and making the software more efficient. Additions and improvements include a timeline sequence map that lets you fully view the 128-track sequence, color coding for partition tabs, Tiller+ enhancements, bulk editing capabilities, multi-select tools, faster sound separation, new 9x16 and 1:1 aspect ratio mask margins, support for new color spaces, advanced workspace customization options, and more. AVID Media Composer 2020.4 includes new bulk editing capabilities. Image credit: AVID AVID Media Composer 2020.4 is a free update for all existing Media Composer users. If you are a first-time user, perhaps someone who is looking for video editing software for their new macOS Catalina machine, the software is available through a subscription model. You can subscribe for one month based on \$23.99/month or for a full year for \$239.00. When you choose an annual subscription, you save just under \$50. For more information about AVID Media Composer, click here. Here.
